Commercial Markets Advisory Service

Connecting communities and commercial markets....

www.metro-edge.com
LISC’s Mission

The transformation of distressed communities into healthy and sustainable communities.

LISC supports local development activities with:

- Loans and grants
- Technical and management assistance
- Local, statewide and national policy support
Community Development Principles in Practice

Our Partners:
• Local community groups, local governments, philanthropic organizations

Their Challenges:
• Data collection is often not a priority
• Limited capacity and resources
• Many communities suffer from ‘planning malaise’
• Connecting data to successful commercial investment
Comprehensive Planning as a Basis for Community Development

What role does information play in the planning and implementation process?

Step 1: Stakeholder mapping and outreach

Step 2: Planning
- Define a collective vision
- Gather data to support market-based decision making
- Prepare Action Plan

Step 3: Early Action Items!
- Identify short-term high impact projects
- Identify resources for implementation

Step 4: Implementation

Step 5: Measurable Results

What role does information play in the planning and implementation process?
Why are we having so much trouble getting retailers to come to our communities?

Factors regarded as significant obstacles to entry into underserved markets

How do we help communities use information to determine a course of action?

The Development Challenges Continuum

Factors we can reasonably control

- Perceived Crime
- Perceived low market demand
- Amenities
- Site Identification
- Shrinkage

Factors more difficult to control

- Actual Crime
- Actual low market demand
- Rent
- Construction costs
- Operating Costs
How can information help us address retailers concerns regarding crime and the perception of crime?

- Distinguish between perception of crime vs. actual crime

**PERCEPTION-BASED STRATEGIES**

- Education
- Marketing

**ACTUAL-BASED STRATEGIES**

- Requires additional data to differentiate between kinds of crime
- Address problem sites through development
- Improve the physical environment (lighting, fencing, landscaping, etc)
How can information help us address retailers’ concerns regarding local market demand?

- Addressing the deficiencies of current market data
- Helping communities set the stage for commercial development efforts
  - Site identification
  - Improve physical environment and visual standards
  - Understand retail attraction methods
- Customized market analysis
Using Alternative Local Demand Indicators

- Recognizing the value of density

**Boston MSA, Median Income**

Darker blue shades represent areas with higher median income.

**Boston MSA, Concentrated Buying Power**

Darker shades represent areas with higher concentrated spending power ($ per mile).

Conventional market analysis

New metrics suggest significant inner city buying power.
Using Alternative Local Demand Indicators

- Recognizing the value of the cash economy

Spending as a Percent of Income

2002 Consumer Expenditure Survey
Lessons Learned

• Data collection as a tool to open stakeholder doors
• Education is key - communities must be involved in the creation of data and know how to use it
• Accurate data must help us differentiate between perception vs. reality issues
• Local leadership is needed for on-the-ground knowledge, political support, access to resources and vision
