Community Development Principles in Practice

Our Partners:

• Local community groups, local governments, philanthropic organizations

Their Challenges:

- Data collection is often not a priority
- Limited capacity and resources
- Many communities suffer from 'planning malaise'
- Connecting data to successful commercial investment

Comprehensive Planning as a Basis for Community Development

What role does information play in the planning and implementation process?

Step 5: Measurable Results

Step 4: Implementation

Step 3: Early Action Items!Identify short-term high impact projects

Identify resources for implementation

Step 2: Planning

- Define a collective vision
- Gather data to support market-based decision making
- Prepare Action Plan

Step 1: Stakeholder mapping and outreach

Why are we having so much trouble getting retailers to come to our communities?

		What is Required to Address these Factors?		
	Factors regarded as signficant obstacles to entry into		Additional Project	Improvements in
	underserved markets	Improved Data		Physical Context
1	Crime/percieved crime			
	Insufficient concentration of retailer's			
2	target customer	\checkmark		
3	Lack of consumer purchasing power	\checkmark		
4	Potential Shrinkage			
5	Rent		\checkmark	
6	Buildout/rehabilitation costs		\checkmark	
7	Site identification		/	\checkmark
8	Inadequate parking			V
9	Higher operating costs		\checkmark	
10	Construction and development costs			
	Lack of amenities to attract out-of-

How do we help communities use information to determine a course of action?

The Development Challenges Continuum

Factors we can reasonably control Perceived Crime Amenities	Factors more difficult to cont Actual Crime Actual market	
Perceived low market demand Shrinkage Site Identification	Operating Costs Constru Costs	Rent
Connecting Communities Using Information to Drive Change		

October 18 - 19, 2007 | The Brookings Institution UMI Forum 2007

How can information help us address retailers concerns regarding crime and the perception of crime?

Distinguish between perception of crime vs. actual crime

PERCEPTION-BASED STRATEGIES

- Education
- Marketing

ACTUAL-BASED STRATEGIES

- Requires additional data to differentiate between kinds of crime
- Address problem sites through development
- Improve the physical environment (lighting, fencing, landscaping, etc)

How can information help us address retailers concerns regarding local market demand?

- Addressing the deficiencies of current market data
- Helping communities set the stage for commercial development efforts
 - Site identification
 - Improve physical environment and visual standards
 - Understand retail attraction methods
- Customized market analysis

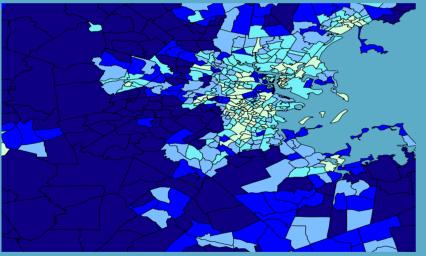

Using Alternative Local Demand Indicators

Recognizing the value of density

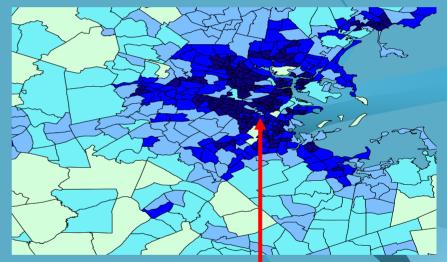

Boston MSA, Median Income

Darker blue shades represents areas with higher median income.

Conventional market analysis

Boston MSA, Concentrated Buying Power

Darker shades represent areas with h gher concentrated spending power (\$ per mile).

New metrics suggest significant inner city buying power.

Using Alternative Local Demand Indicators

Recognizing the value of the cash economy

Spending as a Percent of Income

Lessons Learned

- Data collection as a tool to open stakeholder doors
- Education is key communities must be involved in the creation of data and know how to use it
- Accurate data must help us differentiate between perception vs. reality issues
- Local leadership is needed for on-the-ground knowledge, political support, access to resources and vision
