DATA NOTES

The estimates for cross-border metros reflect only the counties in this specific state. The 100 largest metropolitan areas nationally are selected by population size. Exports include goods and services and are estimated by production location; therefore, they do not match the U.S. Census Bureau's estimates of state and metropolitan exports, which reflect origin-of-movement. Exports exclude waste, scrap, used merchandise, goods returned to Canada, special classification provisions, re-exports, military transfers, government services, and expenditures of foreign embassies and international organizations in the United States. Export growth rate, by value, is inflation-adjusted by industry. The metro share of state exports is rounded to the closest decimal.
