The National Patient-Centered Clinical Research Network

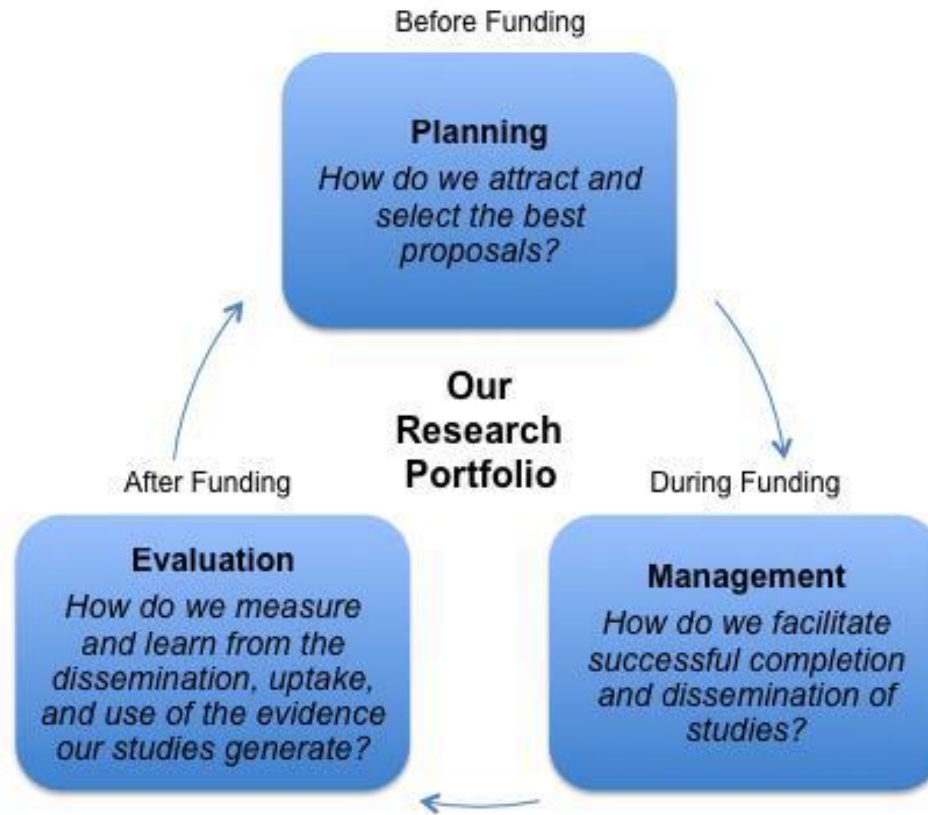

Why Are We Evaluating PCORnet?

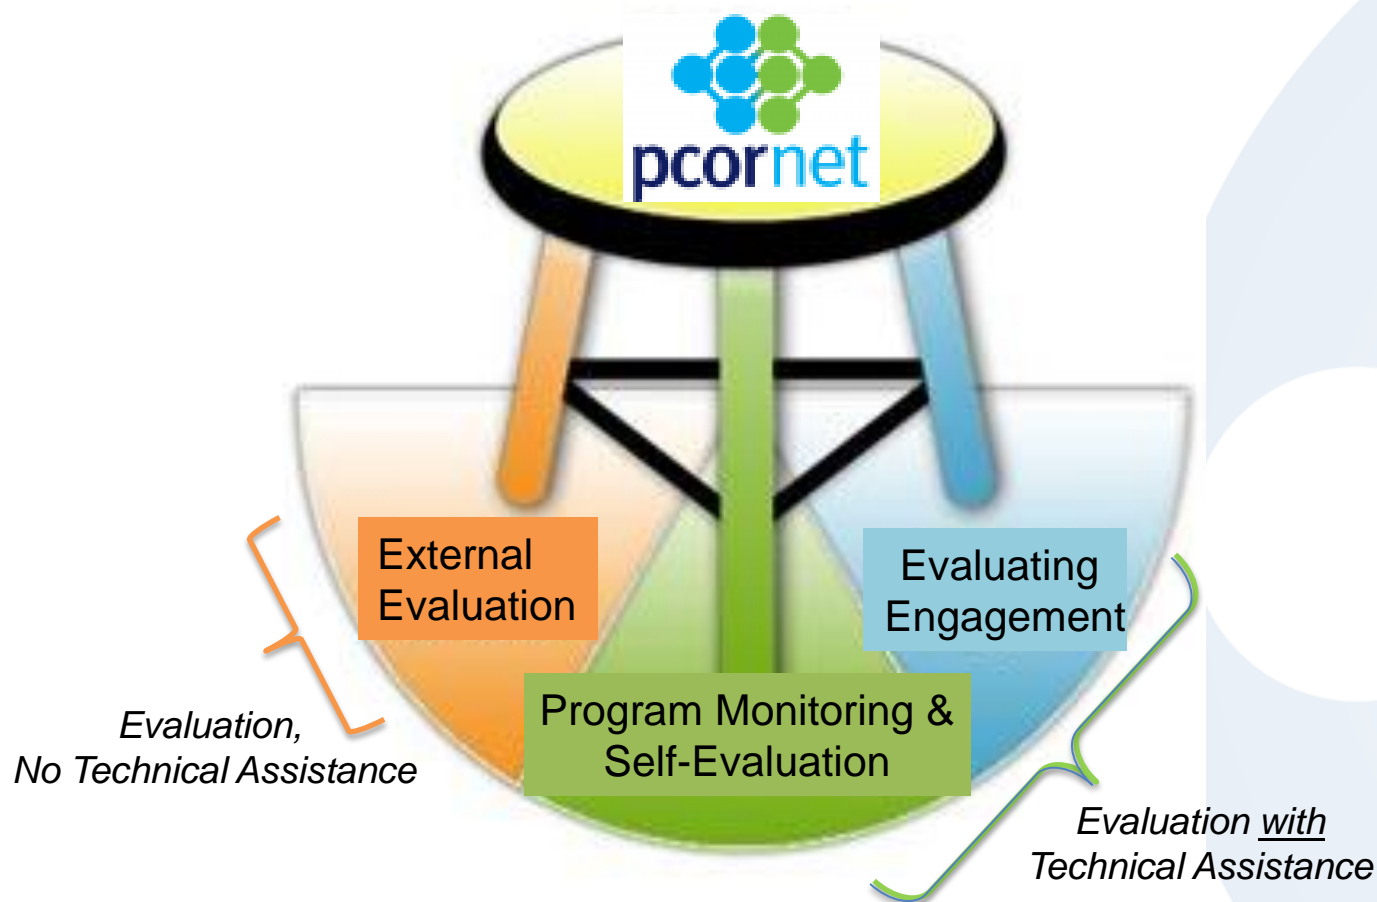

- PCORnet represents an unparalleled opportunity to undertake a real-time examination of key **building blocks** for a successful national research network
- This examination allows us to contribute to PCORI's goal of building a **durable infrastructure** that meets the nation's need for patient-centered CER
- As PCORnet partners, you are ideally positioned to help us understand how to optimize the network...while strengthening your own capabilities

Aligning Our PCORnet Evaluation with PCORI's Strategic Plan

The 3 Components of PCORnet Evaluation Activities

Guiding Principles for Each Component

Evaluation approaches will be:

Disciplined:

- we will only collect data that we--or your network--can act on

Judicious:

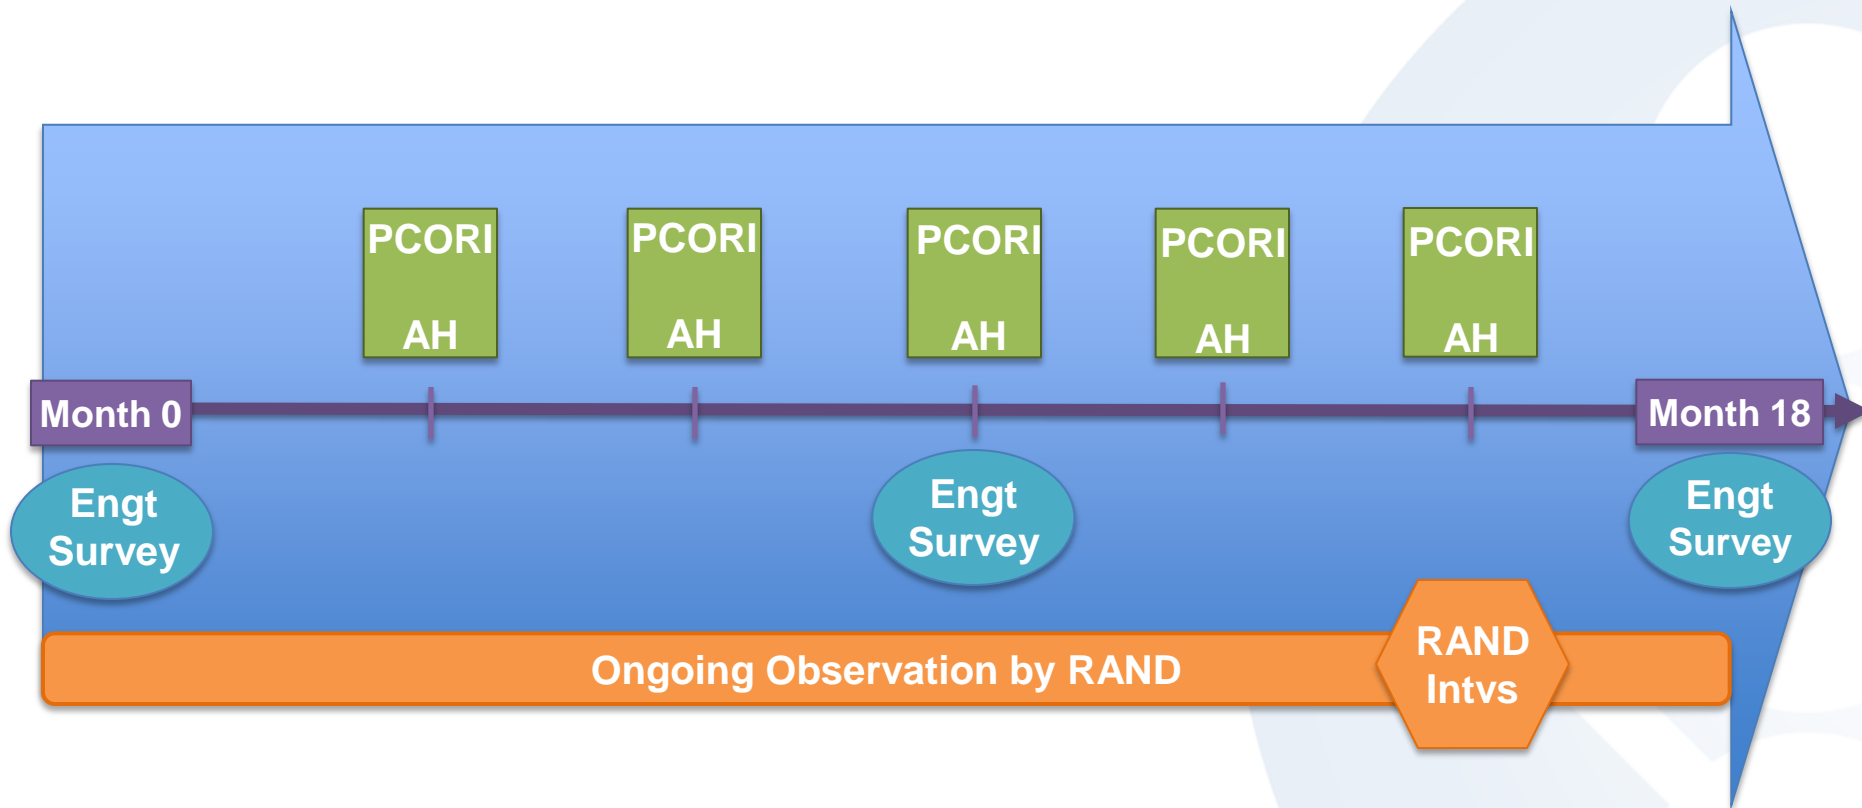

- we will be mindful of how often we ask you for information

Coordinated:

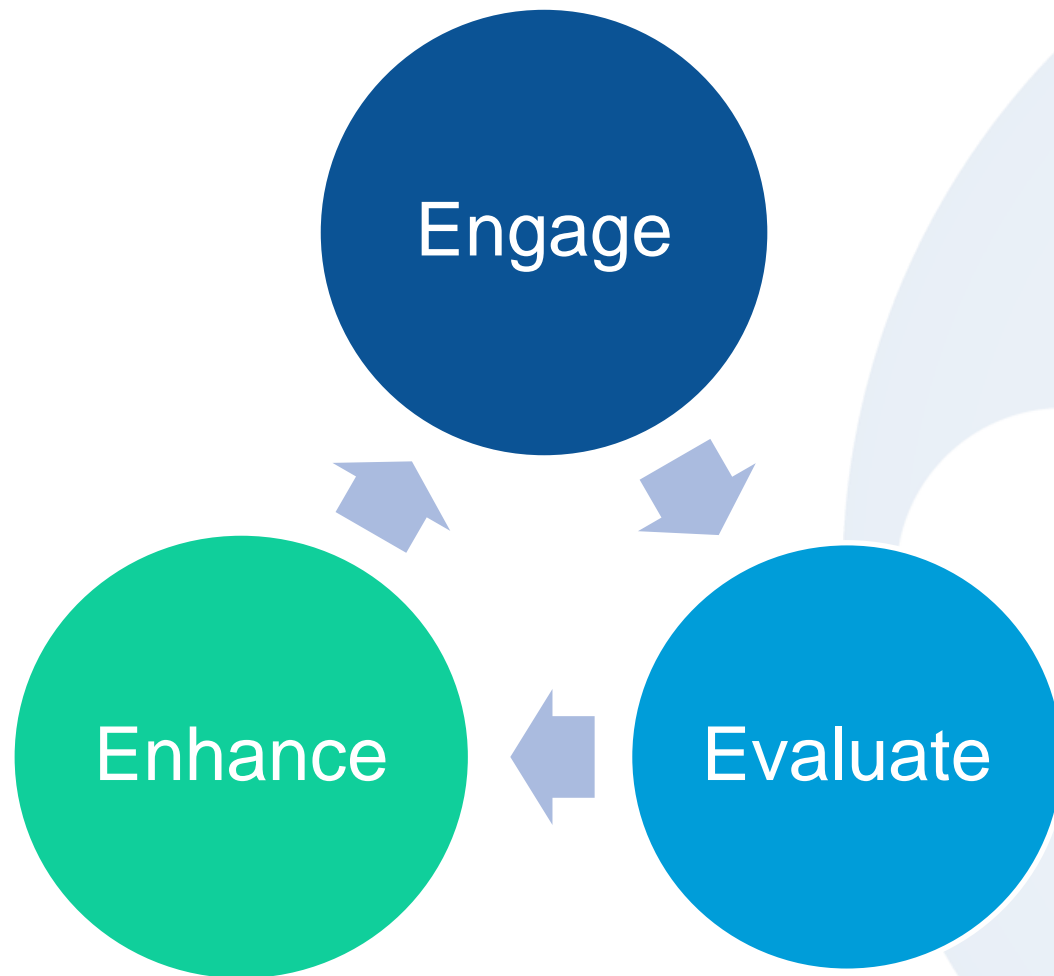

- we will work together to ensure efficient processes

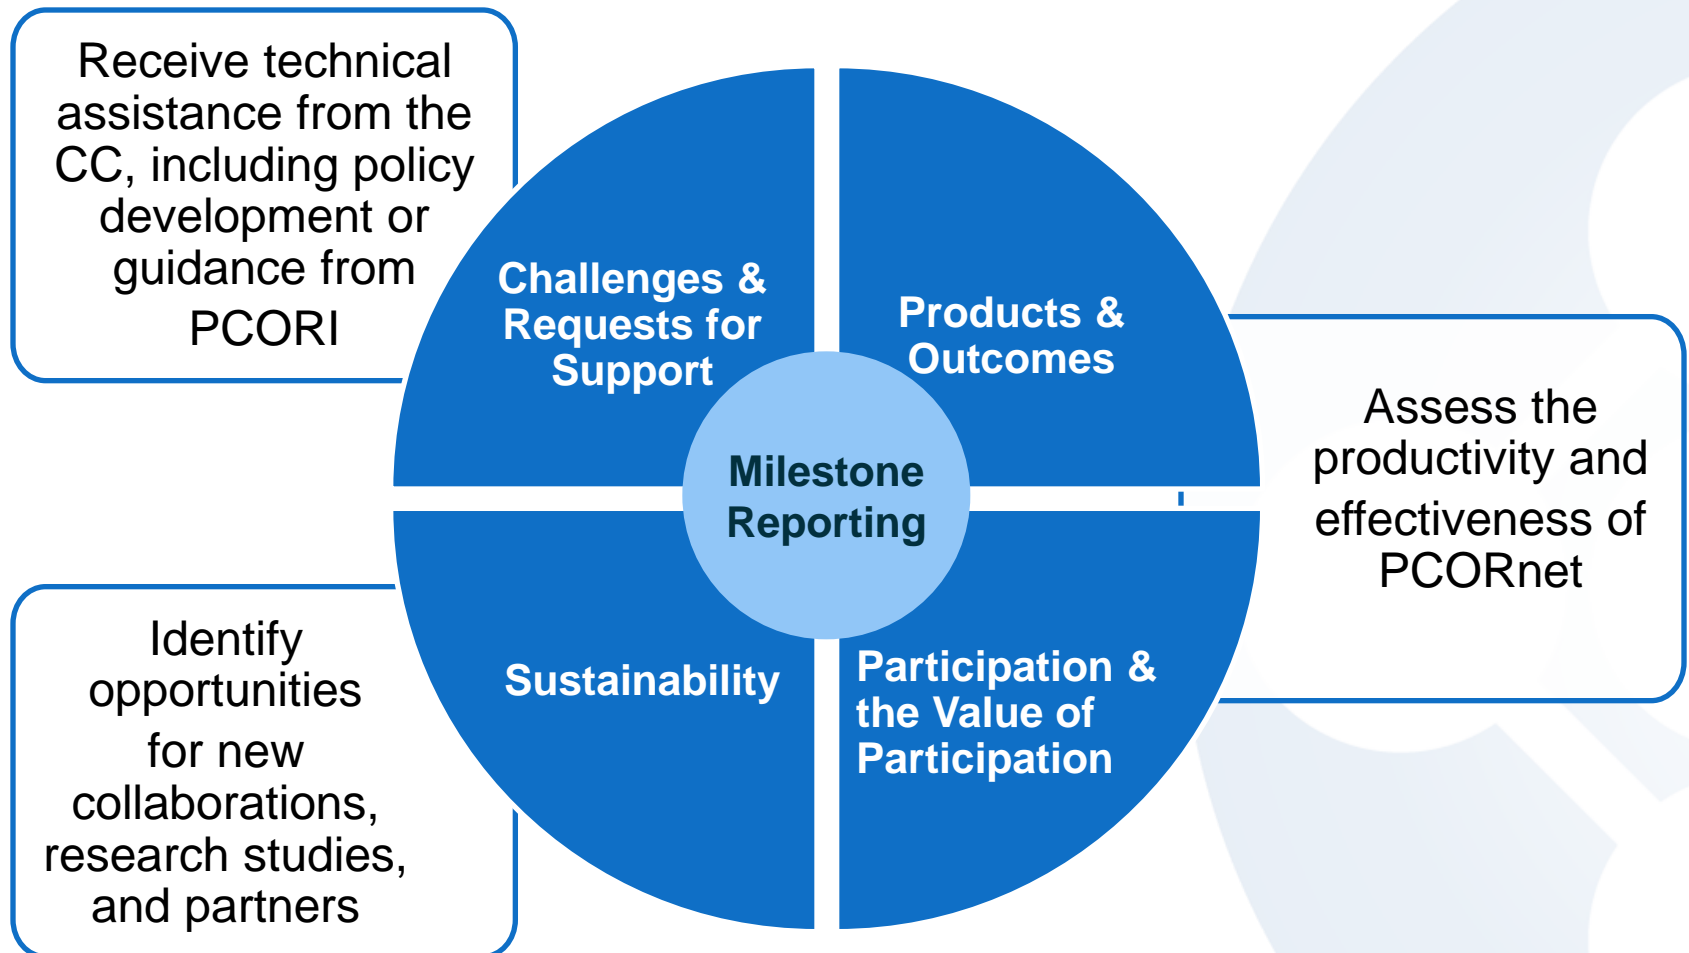

Anticipated Timeline for Assessments

Engaging Patients in Infrastructure

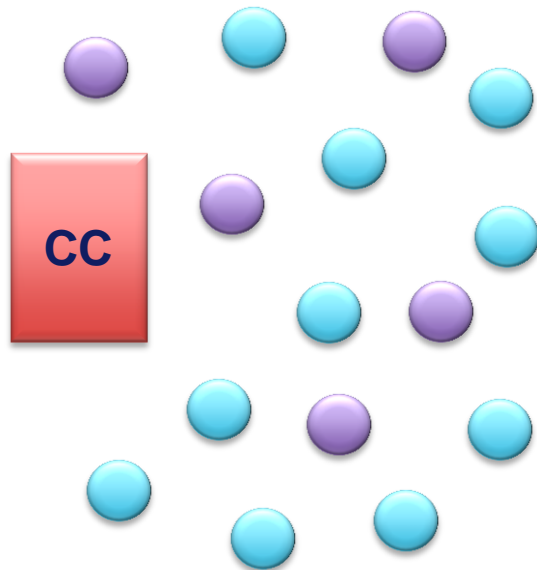

Internal Monitoring to Support Technical Assistance and PCORnet Objectives

External Evaluation

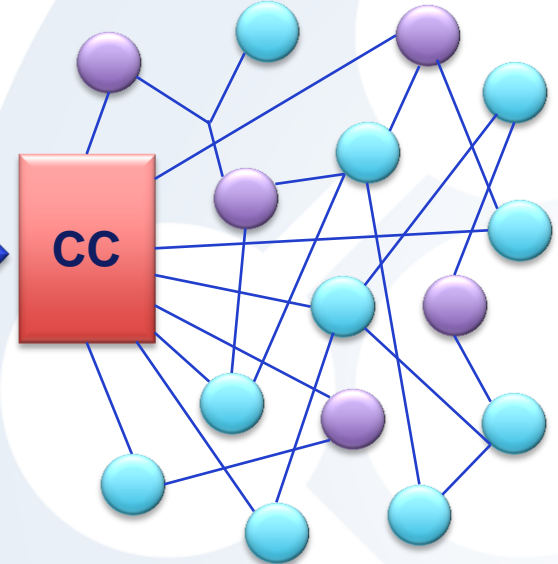

PCORnet Baseline

I. Process Evaluation

II. Barrier/facilitator
Evaluation

PCORnet Future

III. Capability
Evaluation
(@18 months)

Discussion Questions

Engaging Patients

- What evidence do you wish you had with regard to patient engagement?
- How can this evidence support your decision-points about when, why, and whom to engage?

Internal Monitoring

- Are there specific areas for lessons learned (or challenges) that the internal monitoring process should explore or track?
- Are there favorable approaches for asking about needed technical assistance?

External Evaluation

- What do partners view as the most important facilitators of network participation?
- What do partners view as the main challenges to network participation?
