Profile of young adults aged 18-24 in the Washington region

Young people aged 18-24 are in a pivotal transition period from childhood to adulthood and financial independence. Those who earn a high school diploma and a post-secondary credential are much more likely to succeed in the labor market. Blacks and Hispanics consistently fare worse on educational and employment outcomes, placing their economic prospects at risk as well as the region's ability to maintain a skilled and competitive workforce.

All data presented is for the three year period 2011-2013.

DEMOGRAPHICS

Young adults aged 18-24 Share of total population

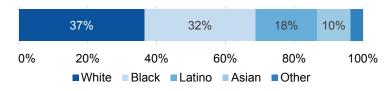

377,786

9.3%

Of young adults in the Washington region, **21.0 percent** are foreign born. The top countries of origin are: **EI Salvador (14%)**, **Guatemala (7%)**, and **Mexico (5%)**.

The Washington region's young adult population is diverse, with no race or ethnicity in the majority.

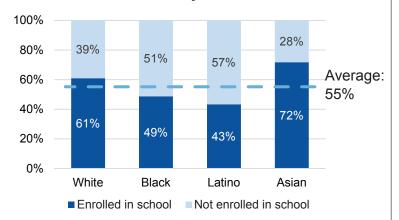

Race/Ethnicity, 18-24 year olds

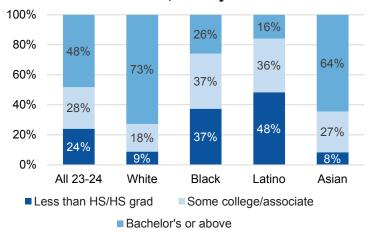

EDUCATIONAL CHARACTERISTICS

Blacks and Latinos have lower than average rates of school enrollment and are much less likely than whites and Asians to have a bachelor's degree by their early 20s.

School enrollment, 18-24 year olds

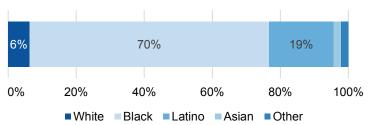

Educational attainment, 23-24 year olds

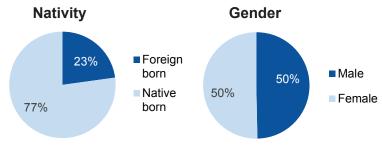

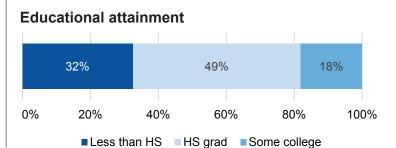

DISCONNECTED YOUTH

Of young adults aged 18-24 in the Washington region, **17,400** or **4.6 percent** are disconnected, meaning they are low-income (with income less than 200 percent of the federal poverty line), neither in school nor working, and have less than an associate degree. These young people are at increased risk for poverty and unemployment.

EMPLOYMENT AND EARNINGS

Young people typically have higher unemployment rates and lower earnings than older workers, consistent with their lower levels of experience and skills. However, young people of color and those with lower levels of education are particularly likely to experience low employment rates and earnings.

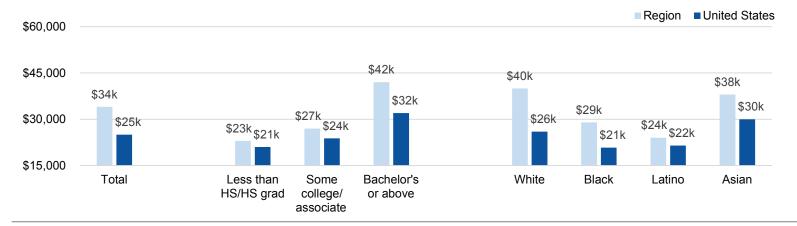

The Washington region's labor market skews toward highly educated workers. Residents without at least some post-secondary education will find it difficult to move into higher earning jobs. Fifty-five percent (55%) of people working in region have a bachelor's degree or above, with median annual earnings of \$88,000. By contrast, 23 percent of people working in region have a high school diploma or less, with median annual earnings of \$36,000.
