Note: For all presidential elections and House elections 1962-2004, turnout is computed using the number of citizens eligible to vote in the United States. For House elections before 1962, it is computed using the voting age population (including non-citizens). For the 2006 elections and future editions of Vital Statistics on Congress, turnout is of voting-eligible population (VEP.) The voting-eligible population is the population that is eligible to vote. Counted among the voting-age population are persons who are ineligible to vote, such as non-citizens, felons (depending on state law), and mentally incapacitated persons. Not counted are persons in the military or civilians living overseas.

Sources: For House elections 1930-60, U.S. Bureau of the Census, Statistical Abstract of the United States (Washington, D.C.: U.S. Government Printing Office). For presidential elections and House elections 1962-2004, numbers were provided by Curtis Gans of the Committee for the Study of the American Electorate at American University. From 2006 to 2010, the VEP was calculated by Michael McDonald found at http://elections.gmu.edu/voter_turnout.htm and calculated against the Federal Election Commission voting data found at http://www.fec.gov.

a. The data show the percentage-point increase over previous election in votes or seats won by Republicans (R) or Democrats (D).
b. Republican and Democratic percentages of all votes excludes districts in which candidates ran unopposed and no vote was recorded.
c. Total percentage of seats won does not equal $100 \%$ due to the election of independents and/or rounding.

Note: D indicates Democrats; R indicates Republicans.
a. The general election figure is the difference between the number of seats won by the party gaining seats in that election and the number of seats won by that party in the preceding general election.
b. The special election figure is the net shift in seats held by the major parties as a result of special elections held between the two general elections. The figure does not include special elections held on the day of the general election. The number of special elections appears in parentheses.
c. The total number of special elections (3) includes the special election of Dianne Feinstein (D-CA) to fill the seat to which John Seymour was temporarily appointed. The special election was held at the same time as the general election (November 3, 1992).
d. Sen. Richard Shelby (AL) switched from the Democratic to the Republican Party the day after the election and brought the total Republican gain to nine.
e. Between the two elections, six Representatives switched parties. When we consider those switches and special election Republican gains, the total 1996 Democratic gain was nine seats.
f. Includes Ed Case (D-HI) who was elected November 30, 2002 after sine die adjournment of the House of Representatives, to fill Patsy Mink's chair (D-HI) in the 107th Congress.
g. Includes Ed Case (D-HI) who was elected in a special election on January 4, 2003 to fill Patsy Mink's (D-HI) chair for the 108th Congress.
h. Includes Marcia L. Fudge (D-OH) who was elected in a special election on November 18, 2008, to fill the remainder during the 110 th Congress of the term of Stephanie Tubbs Jones (D-OH) who died in office. Fudge was also elected in the general election on November 4,2008 , to serve in the 111th Congress.

Notes: D indicates Democrats; R indicates Republicans.
Each entry is the difference between the number of seats won by the president's party in that midterm election and the number of seats won by that party in the preceding general election. Because of changes in the overall number of seats in the Senate and House, in the number of seats won by third parties, and in the number of vacancies, a Republican loss is not always matched precisely by a Democratic gain, or vice versa. Data reflects immediate election results.
a. Although the Republicans gained nine seats in the 1902 elections, they actually lost ground to the Democrats, who gained twentyfive seats after the increase in the overall number of Representatives after the 1900 census.
b. Sen. Richard Shelby (AL) switched from the Democratic to the Republican Party the day following the election, so that the total loss was nine seats.

This table reflects shifts in party control of seats from immediately before to immediately after the November elections. It does not include party gains resulting from the creation of new districts and does not account for situations in which two districts were reduced to one, thus forcing incumbents to run against each other.
Party gains that resulted from an incumbent being defeated in either a primary or general election are classified as incumbent defeats. In situations where the incumbent declined to run again, ran for another political office, or died or resigned before the end of the term are classified as open seats.

Notes: D indicates Democrat; R indicates Republican.
This table reflects shifts in party control of seats from immediately before to immediately after the November election Party gains that resulted from an incumbent being defeated in either a primary or general election are classified as incumbent defeats. In situations where the incumbent declined to run again, ran for another political office, or died or resigned before the end of the term are classified as open seats.
a. Includes John Durkin (D-NH). After a contested election in which incumbent Sen. Norris Cotton did not run, the Senate declared the seat vacant as of August 8, 1975. Sen. Durkin was then elected by special election, September 16, 1975, to fill the vacancy.
b. Sen. Richard Shelby (AL) switched from the Democratic to the Republican Party the day after the election and brought the total change to nine.
c. Includes Norm Coleman (R-MN) who beat Walter Mondale (D-MN) after the death of Sen. Paul Wellstone (D-MN).
d. Does not include AI Franken (D-MN), who was declared on 30 June 2009 to have won the US Senate contest defeating Incumbent Senator Norm Coleman (R-MN). This brings the $R \rightarrow$ Incumbent Defeat up to 5, and the Total Changes up to 8. e. Does not include Incumbent Senator Lisa Murkowski (R-AK), who lost her primary to Joe Miller (R-AK) but won the general election as a Republican write-in candidate.
f. Includes Pat Toomey (R-PA), who defeated Senator Arlen Specter (D-PA). Specter had changed his affiliation from Republican to Democrat in office on April 30, 2009.

Note: The 1966 and 1982 numbers do not include races where incumbents ran against incumbents due to redistricting. We counted incumbents who lost in the primary as their party's incumbent but then ran in the general election as a write-in or third-party candidate as an incumbent loss.
a. This includes Leo Isacson (NY), who was a member of the American Labor Party.
b. This includes Vincent Dellay (NJ), who was elected as a Republican but switched to a Democrat. He ran for reelection as an Independent.
c. This includes Eugene Atkinson (PA), who began his House service January 3, 1979, as a Democrat. He became a Republican on October 14, 1981.
d. This includes Donald Lukens ( OH ) who was defeated in the primary and then resigned on October 24, 1990 and Bill Grant (Fla.) who began his House service January 6, 1987, as a Democrat, but later switched parties. The Republican Conference let his seniority count from 1987.
e. One Democratic incumbent, who served more than ten terms in office, was defeated.
f. Includes Jim Traficant ( OH ) who ran as an Independent after being expelled from the House.
g. Excludes two 13 -term representatives, Charles Stenholm (TX) and Martin Frost (TX), that ran against incumbents as a result of redistricting.
h. Includes Albert R. Wynn (D-MD) who lost his primary on February 13, 2008, and promptly resigned his seat effective May 31, 2008.
i. Includes Parker Griffith (AL) who began his House service January 3, 2009, as a Democrat but switched to a Republican on December 22, 2009.

a. This refers to the winning presidential candidate.
b. This does not include districts where the percentage of the total district vote won by House members equaled the percentage of the total district vote won by the president.
c. We computed this on the basis of the actual presidential vote with John Anderson and others included. If it is recomputed on the basis of President Reagan's percentage of the major party vote, the president ran ahead in 59 districts and behind in 129 districts.
d. We computed this on the basis of the actual presidential vote with Ross Perot included. If we recomputed this on the basis of President Clinton's percentage of the major party vote, the president ran ahead in 72 districts and behind in 179 districts.
e. We computed this on the basis of the actual presidential vote with Ross Perot included. If we recomputed this on the basis of President Clinton's percentage of the major party vote, the president ran ahead in 98 districts and behind in 97 districts.
f. Total as of February 28, 2013 does not include the 11 districts affected by Hurricane Sandy, where President Obama's total vote is not yet available.

Note: Includes only those districts in which two major party candidates competed in both elections and in which the boundaries remained unchanged for both elections. Because of massive redrawing of district lines after each decennial census, no figures are computed for 1970-1972, 1980-1982, 1990-1992, 2000-2002 and 2010-2012.
a. Variance, the square of the standard deviation, measures the extent to which the changes in local returns differ from the change in national returns.

a. These are party identifiers who voted for the candidate of their party.
b. These are party identifiers who vote for the candidate of the other party.
c. The SRC/CPS National Election Surveys use a seven-point scale to define party identification, including three categories of Independents--those who "lean" to one or the other party and those who are "pure" Independents. The "leaners" are included here among the party-line voters. Party identification here means self-identification as determined by surveys.
