

Healthcare Virtual Careers Platform

Mission: To facilitate moving new entrants to the workforce and un- and under-employed workers into careers in the healthcare field by assisting them to obtain the credentials they need to secure jobs in healthcare and healthcare-related occupations .

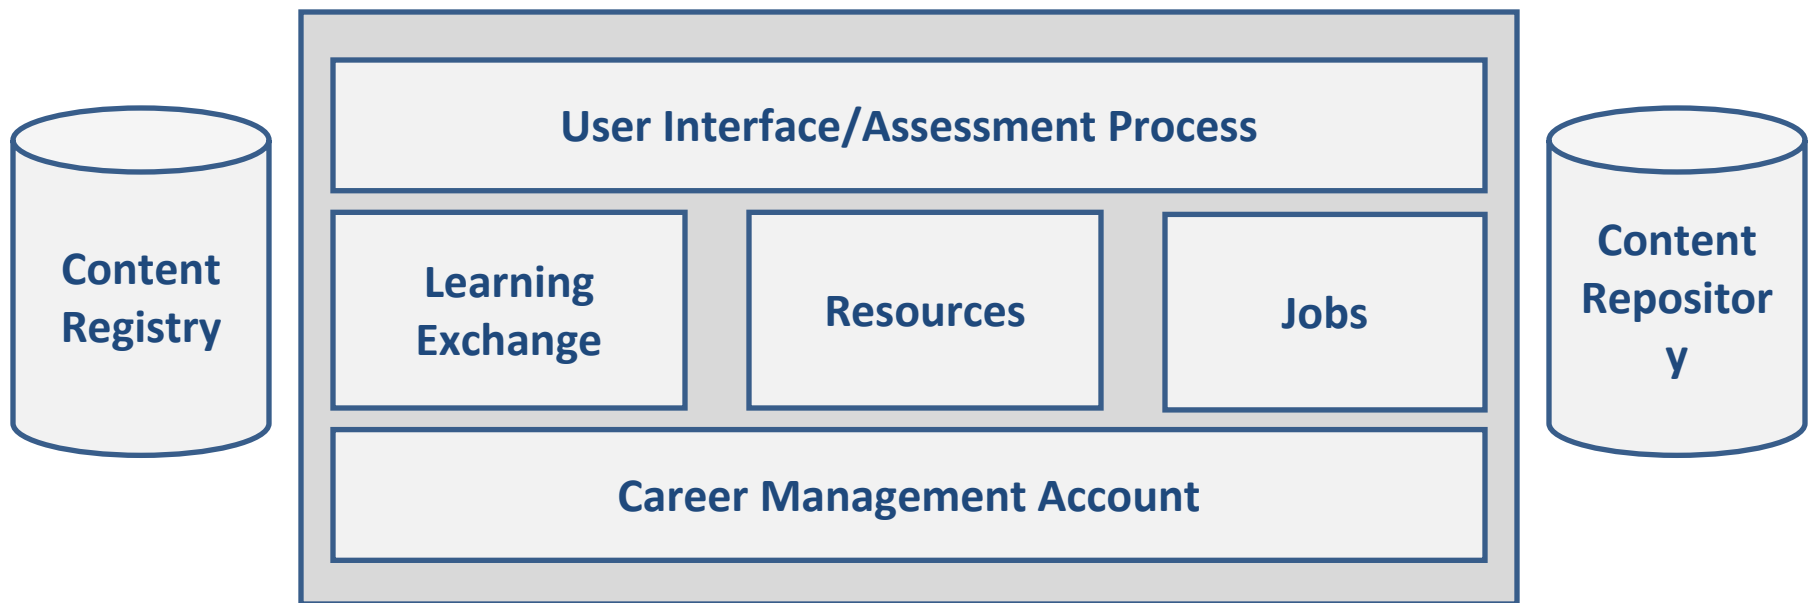

Rationale:

- 1.Occupations in the healthcare field are among those most in demand in our economy;
- 2.There is currently a mismatch between the skills needed in such demand occupations and the skills available in the workforce.
