

Housing Costs, Zoning and Access to High-Scoring Schools

New York-Northern New Jersey-Long Island, NY-NJ-PA metro area

Why school access matters

This report finds that anti-density zoning laws – local regulations that discourage inexpensive housing – lead to inflated housing costs near high-scoring schools, relative to housing costs near low-scoring schools. This housing costs gap drives economic segregation across schools and a higher test score gap between the schools attended by low-income and middle/high income students. Research shows that low-income students are more likely to succeed in higher-scoring schools, so reducing the financial and regulatory barriers to residential and school integration should be a priority.

New York's school access rankings

ZONING RESTRICTIONS

16 out of 100

The metro area has the 16th most restrictive zoning, based on the prevalence of land-use law firms in the state. Restrictive zoning discourages inexpensive housing, driving economic segregation.

ECONOMIC SEGREGATION

8 out of 100

52% of low-income students would have to change ZIP codes to achieve an equal distribution across schools, ranking the metro area the 8th most economically segregated.

HOUSING COST GAP

5 out of 100

Housing costs near high-scoring elementary schools are 3.1 times higher than housing costs near low-scoring schools, ranking the metro area the 5th highest on this measure.

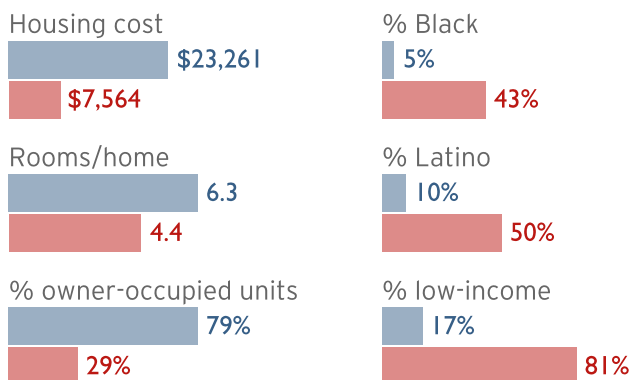

TEST SCORE GAP

17 out of 100

The average middle/high-income student attends a school that ranks 28 percentage points higher on state exams than the school an average low-income student attends, ranking the metro area the 17th highest on this measure.

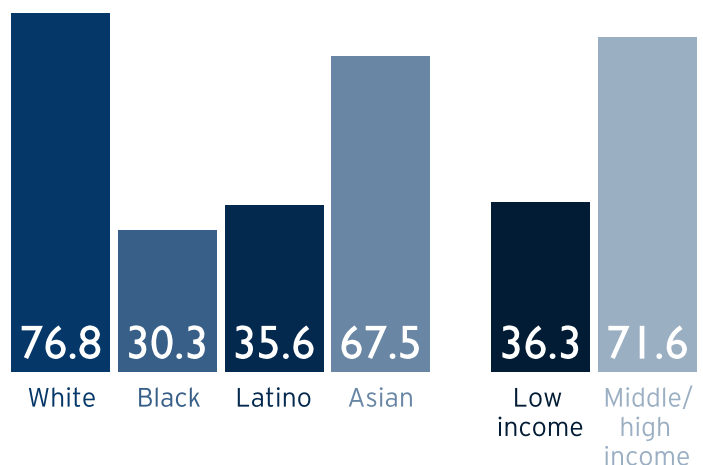

New York school comparisons

These charts compare the average top quintile school (blue) and the average bottom-quintile school (red) in New York across six categories. Quintiles are based on scores of standardized tests taken between 2010 and 2011.

New York test scores by group

School percentile rankings in New York for the average student, broken down by race and income. School test scores are adjusted by state average and ranked nationally.

Data notes

Notes: Housing data for schools are based on Census data from hypothetical attendance zones near schools. Housing costs are based on a weighted average of rental and ownership costs.
