

## Per Capita Carbon Footprints

This table ranks the 100 largest U.S. metropolitan areas based on their per-capita carbon emissions in 2005. To read more on metropolitan areas' performance on key indicators of productive, inclusive, and sustainable growth, please see the recent Brookings report, "MetroPolicy: Shaping a New Federal Partnership for a Metropolitan Nation," available at [www.blueprintprosperity.org](http://www.blueprintprosperity.org).

These figures report the per-capita carbon emissions from passenger and freight transportation and from residential energy consumption—sources of roughly half of all national emissions. Excluded are emissions from commercial buildings, industry, and other modes of transportation such as planes, transit, and trains.
