### **Note on the Methodology of the Afghanistan Index:**

Although the footnotes to the Afghanistan Index document our sources in detail, it is worth noting here a few broad points. The majority of our information comes from the U.S. Government, though we must often analyze it and process it further to show trends over the full period since 2001. Some information comes from foreign journalists on the ground and from nongovernmental organizations; a very modest amount to date comes from Afghan sources. Most tables and charts are straightforward representations of data as we obtain it from the above primary sources, with only modest further analysis and processing required. However, a few graphics, such as those on crime and unemployment rates, require more methodological work (and more assumptions) on our part—and are as a result also perhaps somewhat less precise than most of the tables and charts.

**NOTE:** 2012 number is a "past five months" figure ending March. During the same period, 42 percent of operations were Afghan led. By early 2013, 87% of all operations were Afghan led as the U.S. role quickly transitions to an advisory one with many units autonomous.

**FIGURE 1.7**Attrition (AWOL) Rates among Selected Afghan National Security Forces<sup>7</sup>

**NOTE:** The most recent reporting, as of July 2013, grouped ANP figures previously separate. The attrition rates for ANP from September 2012 to March 2013 are as follows: Sep, 1.1%; Oct, 1.5%; Nov, 1.2%; Dec, 1.0%; Jan, 1.4%; Feb, 1.1%; Mar, 1.3%. The goal remains the same at 1.4% and is considerably lower than ANA attrition.

Proportion of Annual U.S. and Other Foreign Troop Fatalities by Various Causes<sup>17</sup>

\*Improvised Explosive Device

Figures Updated Thru: January 9, 2014

**NOTE:** Figures depicted on the graph illustrate the raw number of such fatalities in a given year. Percentages are calculated based on overall totals for each respective year. "Other Explosives" includes hostile attacks carried out with rockets, grenades and/or mortars. Fatalities from downed aircraft and helicopters are classified under either "Other Hostile" or "Non-Hostile Incidents" depending on whether they were shot down or crashed due to mechanical failure.

**FIGURE 1.18**U.S. Troops Wounded In Action since October 30, 2001<sup>18</sup>**Total from October 7, 2001 through February 27, 2014: 19,665**

The daily Department of Defense casualty reports that we use for our monthly estimates on U.S. troops wounded does not make it entirely clear when in a 24-hour period casualties were incurred. Since the reports are published at 10AM daily, there is possibility that our numbers for January 2005 and onwards are slightly off due to uncertainties about whether casualties occurred on the first or the last of each month.

**FIGURE 1.19**Private Contractor Deaths in Afghanistan, 2001 through 2013<sup>19</sup>

**NOTE:** Numbers correspond to insurance claims received by the U.S. Labor Department, under the Defense Base Act. There have been a total of 1,452 claims since December 31, 2001 (the beginning of the reporting period). Numbers correspond to new claims during the period, meaning the deaths may have occurred in a prior period. All figures through the end of the year noted.

**NOTE:** Figures from 2007 through mid-2009 provided by NATO-ISAF and differ from those published in a January 2009 report released by the U.S. Department of Defense. This report estimated 332 ANA fatalities and 692 ANP fatalities for 2007, with 2008 figures shown only through October 2008. Numbers for the second half of 2009 are estimated based on information from several sources. \*\*2011 and 2012 (through end November) numbers are estimates based off of shorter reporting periods in each year. 2012 numbers are based off reports of monthly averages through November. An article by Rod Nordland in the New York Times on April 20, 2013 quoted an Afghan Ministry of Defense official noted that 1,183 ANA soldiers were killed in the year ending March 20, 2013 compared to 841 in the year ending the same date prior. \*\*\*According to the Afghan Defense Ministry, 276 soldiers were killed March 21 to June 11. We have used the average per day during that period to come up with a yearly estimate through June 20, 2013.

**NOTE:** The **Wolesi Jirga** consists of directly elected provincial representatives. The number of representatives each of Afghanistan's 34 provinces receives is calculated according to population. The Wolesi Jirga constitutes the first step in passing legislation, with all bills passing with two-thirds majority being forwarded to the Meshrano Jirga (House of Elders) and then the President. The Wolesi Jirga also has final say on the appointment of government ministers and other high-ranking officials.

2002	35.5	104	139

**NOTE ON INDEX OF PRESS FREEDOM TABLE:** The Index is based on a questionnaire with 50 criteria for assessing the state of press freedom in each country. It includes every kind of violation directly affecting journalists (such as murders, imprisonment, physical attacks and threats) and news media (censorship, confiscation issues, searches and harassment). In addition to taking into account abuses attributable to the state, those carried out by armed militias, clandestine organizations or pressure groups are also considered.

The lower the score attained, the higher the degree of press freedom in that respective country. Although there is no specific information given regarding how the overall score was compiled, the top-rated countries for 2007 received an overall score of 0.75, with the median receiving a score of 25.3. The overall average score for the 2007 Index was 31.5.

(T): Indicates years Afghanistan's score tied with one or more other country.

**NOTE:** The CPI is a composite index that draws on 14 expert opinion surveys. It scores countries on a scale from zero to ten, with zero indicating high levels of perceived corruption and ten indicating low levels of perceived corruption. Due to a lack of reliable data, Afghanistan was not included in the CPI survey for the years 2006.
