New Approaches to Immigration for the Region

Build English Skills and Increase Language Access

Build on the Mayor's language access program region-wide

Increase availability of English training

Connect newcomers to services and opportunities in their own languages

Make Immigrant Integration a Shared Regional Goal

Recognize that immigration is a region-wide issue by creating a **Council on Immigration**

Draw on city and suburban leaders to develop a regional plan for meeting immigrants' needs and facilitating integration

Build networks between agencies and organizations to develop and prioritize strategies to serve immigrant newcomers and long-term residents alike

Understand Changing Dynamics through a Centralized Data Source

Timely data is needed for greater understanding of the changes in immigration; no existing source provides everything

Create a central data clearing house that builds on existing research and data

Collect data, prioritize reporting topics, produce timely reports and online databases
