Foreword	xi
Acknowledgments	xix
Abbreviations and Conventions	xxi
1 Introduction	1
1.1 Challenges to Effecting Change	2
1.2 The PIJC Concept	5
1.3 Overview of PIJC in Developing and Transition Countries	9
1.4 Caveats and Contents	19
2 The PIJC Approach	22
2.1 Canonical Steps in a PIJC Application	22
2.2 Decomposition of the PIJC Mechanism	32
2.3 Types of PIJC Incentive Mechanisms	39
2.4 Monitoring and Evaluation in the PIJC Approach	45
2.5 A Framework to Assess PIJC Experience to Date	48
2.6 Selection and Organization of Case Studies	51
3 Review of Certification Experience	54
3.1 Simple Certification	55
3.2 Pecuniary Certification	82

4	Review of Tournament Experience	99
	4.1 Pure Tournaments	99
	4.2 Mixed Tournaments	124
5	Review of Other Relevant Experience	151
6	Synthesis and Analysis	166
	6.1 Influence of PIJC Design Characteristics on Project Outcomes	167
	6.2 Comparing the Effectiveness of Alternative Project Designs	197
	6.3 Sustainability and Scalability of PIJC Applications	211
	6.4 Role of Initial Conditions and Other Requirements for Successful PIJC Applications	229
	6.5 Selecting the Appropriate Incentive Design	234
7	Conclusions and Scope for Future Applications	251
	7.1 Clarifying the Fundamental Issues	251
	7.2 Pros and Cons of the PIJC Approach	255
	7.3 Simplifying the PIJC Approach	287
	7.4 Areas for Follow-Up Research and Testing	290
Appendixes		
A.	Inventory of Projects	297
B.	Technical Exhibits for the Detailed Case Study Assessments	318
	B1. Russian Fiscal Tournament Indicators	318
	B2. Nigerian Scorecard Assessment Calculation	320
	B3. Summary of Municipality Ranking Variables, <i>Mancomunidades</i> Project, Honduras	321
C.	Anatomy of a PIJC Application	325
D.	Mathematical Treatment of PIJC Leveraging of Sponsor Funds	336
	References	347
	Index	355
List of Boxes		
	1-1. Linking Budget Support to Performance	13
	1-2. ILO Program for Small Enterprise Development	16
	4-1. Screening Process for the Galing Pook Awards	101
	6-1. The EU Accession Game	227
	7-1. Design Parameters to Calibrate or Set in a PIJC	282

List of Figures	
4-1. KDP Management Structure	113
4-2. The Process of Allocating Funds in the Activity Cycle (Round)	114
6-1. Potential Linkages between Process-Product Sustainability and Incentive Design	216
D-1. Derivation of When Tournaments Are Preferred to the Standard Contract	345

List of Tables	
2-1. Typology and Examples of PIJC Incentive Designs	41
2-2. Desirable Incentive Characteristics Available to Alternative PIJC Designs	49
2-3. Topics for Evaluating Full and Partial PIJC Applications	50
2-4. Substantive Areas of Potential Interest for Investigation	51
2-5. Organization of PIJC Application Vignettes	53
3-1. Impacts of CRCs in Different Locations	65
3-2. Variation in Institutional Forms of CRCs	66
3-3. Number of Evaluations Performed by USAID Missions, 1993–97	77
3-4. Summary of Auditor’s Findings on R4 Reporting at Seven Missions, 2001	78
4-1. Award Criteria and Weight	102
4-2. Kecamatan Budget Limits to Distribute among Its Villages	115
5-1. Summary of Initiatives with PIJC Components, by Substantive Category	152
6-1. Comparison of Characteristics and Impacts of Case Studies Assessed	168
6-2. Case Study Correlations of Task Participation and Resulting Project Success	172
6-3. Effect of Desirable Characteristics on PIJC Project Success	176
6-4. Case Study Correlations of Substandard Effort Concern and Mechanism Design	177
6-5. Case Study Correlation of Participation Objective and Choice of Pure Tournament	178
6-6. Case Study Correlations of Ex-Post (Input or Output) Incentives and Project Success	178
6-7. Case Study Correlations of Project Sustainability and Voluntary Participation	179
6-8. Case Study Correlations of Ex-Post Output Incentives and the Need for Greater Monitoring	184
6-9. Is the Need for Collective Action Associated with Larger PIJC Rewards?	190
6-10. Do Sponsors Give Funds Up Front to Winners of PIJCs Requiring Large Investments?	191

X CONTENTS

6-11. Summary of Case Study Game Objectives, Costs, Duration, and Number of Players	193
6-12. Incentive Design Influence on Link between Process and Product Sustainability	217
6-13. Choice of PIJC Incentive Design by Project Type	240
7-1. Comparison of Complexity and Cost of Alternative Project Designs	257
D-1. Conditions for an Approach to Be Preferred, Given $N^a = N^s$	344
