About This Study

The Office of the State Superintendent of Education commissioned this study in late 2006, with original impetus from a federal directive for the city to study how quality public school options can retain and attract families to live in the District of Columbia. Three DC-based organizations — 21st Century School Fund, the Brookings Institution, and the Urban Institute — collaborated to conduct the research, bringing their distinct perspectives and expertise on education, housing, and neighborhood development in the District.

Three key factors differentiate this study from past research. First, it looks at all public schools and public school students — District of Columbia Public Schools (DCPS) and public charters — as part of different education sectors, but one public education system. Second, the analysis was done using a common set of indicators, reported for all schools and students that allows for rigorous comparisons across sectors and geography. Finally, this study assesses school conditions and results in the context of housing market and neighborhood trends to better understand the interplay between the two policy domains. The analysis in the Research Report (Volumes I and II) informs a companion policy report, “Quality Schools, Healthy Neighborhoods, and the Future of DC.”

Appendix Detail

The study team used a multi-faceted approach to the research and analysis in this project. The study team compiled three types of quantitative data – student-level data from 2003 through 2006, school-level data from 2006, and neighborhood data from 2000 through 2006 - that enabled us to analyze school supply, enrollment patterns, and their relationships to neighborhood change.

The student-level data set contains 10 variables about the characteristics of the DCPS and public charter students for each year, including their home address, race, language proficiency, special education status, free and reduced lunch eligibility, grade, and school attended. We also collected separate student-level data on special education students and Archdiocese students (including those students receiving vouchers to attend parochial school). We relied on OSSE’S student longitudinal Multi-Year Enrollment Automated Database (MEAD) to determine student mobility between public schools. The school-level data set includes over 120 variables for each DCPS and public charter school such as program type, teacher-student ratio, building condition, enrollment, and location. Key variables were measured and then grouped together in order to rank each public school on its level of resources, results, and risks. For the neighborhood data, we analyzed federal and local administrative data sets on population demographics, births, and housing trends. We also categorized and ranked each neighborhood’s housing market, diversity, and median income level.

Appendices A, B, C, and D provide extensive detail for individual schools and neighborhoods on the full range of indicators presented in the Research Report, Volume I.

Volume II, Appendices

Source List

Appendix A

Data Tables A1, A2, and A32 are calculated using audited enrollment data from the Office of the State Superintendent of Education for SY2006-07.

Data Tables A3 to A31, A33 to A41, and A43-A54 are calculated using student-level data from DCPS, Board of Education, and Public Charter School Board for SY2003-04, 2004-05, 2005-06, and 2006-07.

Data Table A42 is calculated using student-level data captured from the DCPS Division of Transportation (DOT) system in October 2006.

Data Tables A55 to A59 are calculated using student-level data from the Archdiocese of Washington for its K-8 schools.

Appendix B

Data Table B1 is a compilation of data computations on School Resources, Risks, and Results – see source list from tables B4, B5, B8, B9, B10, B11, C13, and C14 below.

Data Tables B2 and B3 are calculated using audited enrollment data from the Office of the State Superintendent of Education for SY2006-07 and DCPS 2006 facilities assessment from Facilities Master Plan.

Data Tables B4 and B5 are calculated using 2006-07 DCPS, PCSB, and BOE October student enrollment files (pre-audit); 2006-07 DCPS local schools budget; CFO's Report on Schedule of Payments to Charter Schools, FY99-07; DCPS Office of Facilities Management; public charter schools survey; DCPS Division of Educational Accountability; and DCPS 2006 facilities assessment from Facilities Master Plan.

Data Tables B6 and B7 are calculated using audited enrollment data from the Office of the State Superintendent of Education for SY2006-07.

Data Tables B8 and B9 are calculated using 2006-07 DCPS, PCSB, and BOE October student enrollment files (pre-audit) and Census 2000.

Data Tables B10 and B11 are calculated using Spring 2007 DC-Comprehensive Assessment System (DC-CAS) scores.

Data Tables B12 and B13 are based on comparisons of Schools Resources, Risks, and Results computed in Data Tables B4, B5, B8, B9, B10, and B11.

Appendix C

Data Tables C1 to C10 are calculated using the 2001-2006 Multi-Year Enrollment Automated Database (MEAD) from the Office of the State Superintendent of Education. Basic yearly indicators based on the 2001-2006 MEAD database and the 2001-2005 NCES Common Core of Data Public Elementary/Secondary School Universe Survey.

Data Table C11 is calculated using MEAD and Data Tables B10 and B11.

Quality Schools and Healthy Neighborhoods: Research Report Volume II, Appendices

Data Table C12 is calculated using 2006-07 DCPS, PCSB, and BOE October student enrollment files (pre-audit).

Data Tables C13 and C14 are calculated using 2006-07 DCPS, PCSB, and BOE October student enrollment files (pre-audit); DCPS Office of Facilities Management; public charter school survey; and OSSE Multi-Year Enrollment Automated Database.

Data Tables C15 to C18 are based on Data Tables B4, B5, B8, B9, B10, B11, C13, and C14.

Appendix D

Data Table D1 is a compilation of data computations on neighborhood factors - housing markets, birth rates, demographics, and public school participation; see source lists for Data Tables D2, D6, D15 and D18 for additional information.

Data Tables D2 and D3 are calculated using DC Real Property Data, 2000-2006.

Data Table D4 is calculated using Data Tables B4, B5, B8, B9, B10, B11, C13, and C14.

Data Table D5 is calculated using audited enrollment data from the Office of the State Superintendent for Education for SY2006-07.

Data Table D6 is calculated using 2000 Census and Home Mortgage Disclosure Act Data, 2000-2005.

Data Tables D7 and D8 are calculated using Data Tables B4, B5, B8, B9, B10, B11, C13, C14, and D6.

Data Tables D9 and D11 are calculated using Data Tables B4, B5, B8, B9, B10, B11, C12, C13, and C14.

Data Tables D10 and D12 are calculated using Data Tables B4, B5, B8, B9, B10, B11, C13, and C14, 2000 Census, and Metropolitan Police Department (MPDC), Central Crime Analysis Unit.

Data Table D13 is calculated using MEAD and Data Table D2.

Data Table D14 is calculated using MEAD and Data Tables B4, B5, B8, B9, B10, B11, C13, and C14.

Data Tables D15 and D16 are calculated using DC Real Property Data, 2000-2006 and Data Tables B4, B5, B8, B9, B10, B11, C13, and C14.

Data Table D17 is calculated using DC Real Property Data, 2000-2006 and 2006-07 DCPS, PCSB, and BOE October student enrollment files (pre-audit).

Data Table D18 and D19 are calculated using DC Health Statistics and Vital Statistics.

Data Table D20 is calculated using DC Health Statistics and Vital Statistics, and Data Tables B4, B5, B8, B9, B10, B11, C13, and C14.
