

When transparency pays:
The moderating effect of reporting quality
on changes in the cost of debt

Christine Cuny
Svenja Dube

Motivation

Research Question

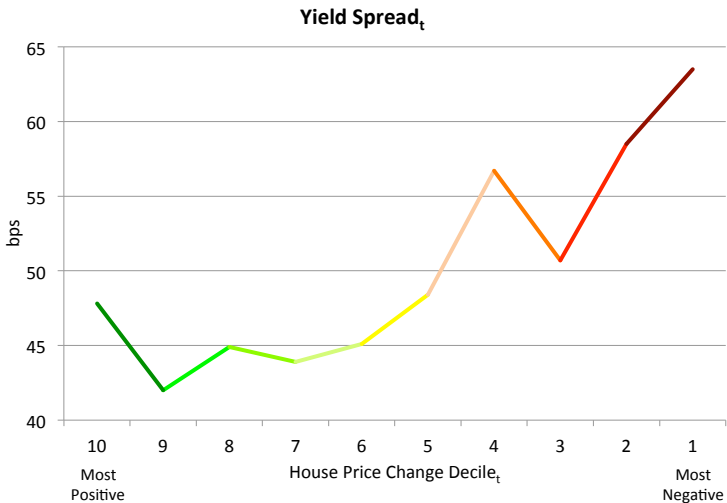

Is the relation between changes in the economy and changes in the cost of debt moderated by financial reporting quality?

Research Question

Is the relation between changes in the economy and changes in the cost of debt moderated by financial reporting quality?

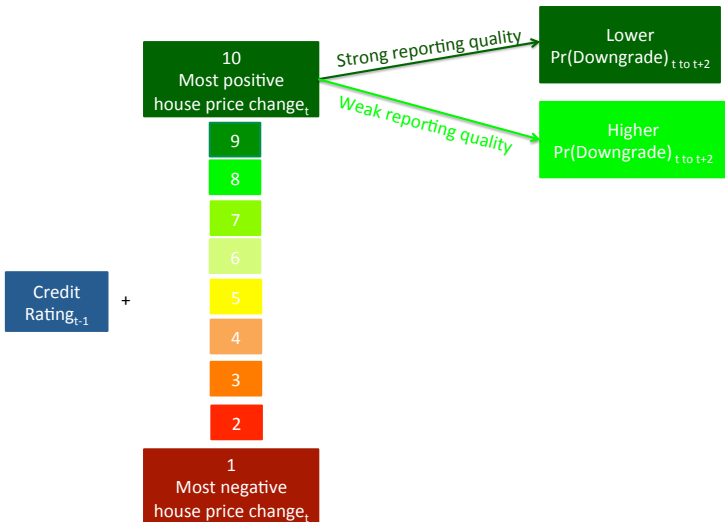

Research Question

Is the relation between changes in the economy and changes in the cost of debt moderated by financial reporting quality?

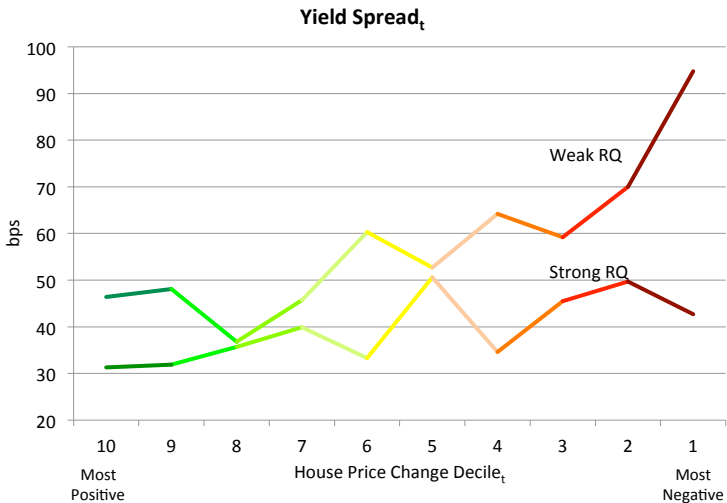

What is Financial Reporting Quality?

Attribute	Empirical measure
① Accessible	Web site transparency grade
② Comprehensive	GFOA Certificate
③ Reliable	Unqualified audit opinion No material weakness Independent auditor
④ Timely	Date of audit opinion Date of EMMA filing
⑤ Compliant	GAAP State Annual EMMA filings

$$\log \left[\text{Odds}(\text{Downgrade}_{i;t,t+1,t+2}) \mid \text{CreditRating}_{i,t-1}, \text{HousePriceChangeDecile}_{i,t} \right] \\ = \beta \text{ReportingQuality}_{i,t-1} + \sum \gamma \text{Controls}_{i,t} + \varepsilon_{i,t}$$

	Pred.	Downgrade _{t+2}
Reporting quality	<1	0.677***
Controls for other rating inputs		YES
Controls for other downgrade determinants		YES
Observations		2,917
Chi-squared		177.4
p>Chi-squared		0.00

Problem: Is it financial reporting quality, *per se*?

Solution: Bond insurance as an Instrument

	Pred.	Downgrade _{t+2}	
Instrumented Reporting quality	<1	0.008***	0.015***
Controls for other rating inputs		YES	YES
Controls for other downgrade determinants		YES	YES
Time period		All years	<= 2010
Observations		2,902	1,567
Pseudo R-squared		0.212	0.306

Key Takeaway

- Strong reporting quality attenuates the impact of negative economic outcomes
