Are State & Local Governments Prepared for the Next Recession?

Laura Porter, Head of Global
Public Finance and
Infrastructure

29 January 2020

Are State & Local Governments Prepared for the Next Recession?

- For the vast majority of state & local governments, Fitch believes the answer is YES
- States and local governments have been bolstering financial resilience and will be able to adjust to anticipated challenges
- Most state and local government ratings maintain Stable Rating Outlooks and we expect that will remain the case throughout the next recession

Rating Through The Cycle

- Fitch's rating definitions distinguish credits primarily based on relative vulnerability to adverse business or economic conditions
- Focus is on forward-looking expectations rather than point-in-time assessments
- Expect a government's performance to vary, potentially considerably, throughout an economic cycle
- Overarching philosophy is that fundamental credit quality does not, and ratings should not, change due to normal cyclical variations

Rating Criteria for U.S. State & Local Governments

- Four key areas of analytical consideration:
 - Revenue Framework
 - Expenditure Framework
 - Long-Term Liability Burden
 - Operating Performance
- Scenario analysis considers issuer-specific fundamentals and potential performance under a standard economic stress, highlighting how cycles affect individual issuers differently

Scenario Analysis

- From a credit evaluation perspective, scenario analysis helps isolate characteristics that make credit/rating transition more likely
- Fitch Analytical Stress Test (FAST) model illustrates how an issuer's financial position can change through an economic cycle and the level of change considered consistent with the existing rating
- The tool supports Fitch's through-the-cycle analysis and is an important consideration in the rating process, although it does not dictate a rating outcome
- The tool generates scenarios, not forecasts

Scenario Analysis Differs for State & Local Governments

- Governments have three broad categories of financial flexibility: revenue increases, expenditure cuts and use of reserves
- States have substantial control over revenue raising and spending, while local governments have less control but in general a higher level of available reserves
- As such, local scenario analysis is focused on the maintenance of reserves, whereas state scenario analysis is more oriented to comparisons of the level of budget shortfall that may need to be addressed in a downturn
- Both state and local scenario analyses incorporate an assessment of (1) the tools that the government has to respond to downturns and (2) which of these tools they are more or less likely to use

Consideration of Reserve Fund Adequacy

- Fitch does not set static reserve expectations by rating level
- Fitch considers reserve adequacy in the context of the issuer's ability to control revenues and spending ('inherent budget flexibility') and historical revenue volatility
- Reserve levels are expected to fluctuate throughout the economic cycle
- Reserve expectations are issuer and rating specific, tied to assessed inherent budget flexibility and communicated as a multiple of likely revenue decline in a moderate downturn scenario

Scenario Analysis Example

Minimal Inherent Budget Flexibility

Select an issuer:

Scenario Parameters:	Year 1	Year 2	Year 3
US GDP Assumption (% Change)	-1.0%	0.5%	2.0%
Inflation/Expenditure Growth Assumption (% Change)	2.0%	2.0%	2.0%
Revenue Output (% Change)	-1.0%	1.2%	2.9%
Inherent Budget Flexibility:	Minimal		▼

Scenario Analysis Example

Superior Inherent Budget Flexibility

Select an issuer:

Scenario Parameters:	Year 1	Year 2	Year 3
US GDP Assumption (% Change)	-1.0%	0.5%	2.0%
Inflation/Expenditure Growth Assumption (% Change)	2.0%	2.0%	2.0%
Revenue Output (% Change)	-2.3%	0.2%	2.8%
Inherent Budget Flexibility:	Superior ▼		

Local Governments Have Strong Financial Resilience

- The average IDR of 'AA' reflects local governments' inherent strengths:
 - The authority to levy property taxes, nonpayment of which can result in property foreclosures
 - Additional taxing power that can include sales, utility, and income taxes
 - The ability to control spending to at least a moderate degree
 - The essentiality of and lack of competition for services provided by local governments
 - Moderate carrying costs relative to spending and reasonable long-term liabilities (including debt and pensions) relative to economic resources
 - Sufficient reserves to offset a revenue decline in a typical economic recession
- These attributes contribute to our assessment that most Fitch-rated local governments have a high level of financial resilience throughout economic cycles

From Fitch's Tax-Supported Rating Criteria

“Strong financial decision making can result in a high rating for a credit with a comparatively higher underlying risk profile if Fitch judges that adequate steps have been taken to mitigate risks. On the other hand, weak financial decision making can result in a lower rating than a credit's underlying risk profile would suggest.”

Fitch Forecasting Slowdown, Not Recession

Fitch U.S. Economic Forecast (Dec. 2019)				
(%)	2018	2019	2020F	2021F
GDP Growth	2.90	2.30	1.70	1.70
CPI Inflation (End-year)	1.90	2.20	2.30	2.50
Policy Interest Rate (End-year)	2.50	2.00	2.00	2.25
U.S. 10-Year Yield	2.83	1.85	2.25	2.75

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts.

As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
