P16. Some pension and retirement plans base benefits on a formula involving age, years of service and salary, often called a defined benefit plan. Some plans, such as a 401K, base benefits on how much money has accumulated in a person's pension or retirement account, often called a defined contribution plan. Other plans use both ways of setting benefits. What type of plan (do you/does Reference Person) have?

*Defined Contribution plans include 401-K 403-B, ESOP, SRA, thrift/savings, stock/profit sharing, and money purchase plans, and target date funds (TDF).*

We'd like to know more about how old you were when you had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in your childhood.

ParentSepEHC. If your parents or guardians separated during your childhood, please tell me how old you were at the time of each separation, starting with the first time they separated. Any other separations?--SLF RPT REFERENCE PERSON AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old Reference Person was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT REFERENCE PERSON AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old Reference Person was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--OTR RPT REFERENCE PERSON AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old you were when you had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in your childhood.

ParentSepEHC. If your parents or guardians separated during your childhood, please tell me how old you were at the time of each separation, starting with the first time they separated. Any other separations?--SLF RPT SPOUSE/PARTNER AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

SchoolEHC. At what age did you first start going to school? If you changed schools during your childhood, please tell me how old you were each time, starting with the first time. Any other school changes?--SLF RPT SPOUSE/PARTNER AGE 13

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old (Spouse/Partner) was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If (Spouse's/Partner's) parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT SPOUSE/PARTNER AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

We'd like to know more about how old (Spouse/Partner) was when (he/she) had the health condition(s) we just talked about.

To help you remember, I want to first ask you about some things that may have happened in (his/her) childhood.

ParentSepEHC. If (Spouse's/Partner's) parents or guardians separated during (his/her) childhood, please tell me how old (he/she) was at the time of each separation, starting with the first time they separated. Any other separations?--SP RPT SPOUSE/PARTNER AGE < 1

*The 3 landmark health EHC questions asked only about ages of the parental separation, move, or school start/change if any of these events happened. If the response to any landmark question was a denial across all 17 possible ages, we recoded those 17 age variables to inap.*

## ER70680 "K-6 NON-SPEC PSYCHOL DISTRESS SCALE"

NUM(2.0)

The K-6 Non-Specific Psychological Distress Scale

*This scale was developed by Dr. Ronald Kessler, Professor of Healthcare Policy at Harvard Medical School. It includes six items, H59a-H59f (ER70674- ER70679), using a scale of 1-5, which ranges from 'all of the time' to 'none of the time.'*

*The items are rescored as follows: A response of 'All of the Time' = 4 points, 'Most of the Time' = 3 points, 'Some of the Time' = 2 points, 'A Little of the Time' = 1 point, and 'None of the Time' = 0 points.*

*The scores are summed; a score of 13 or higher indicates sensitivity around the threshold for the clinically significant range of the distribution of nonspecific distress.*

**NUM(1.0)**

M1. Next, we will be talking about donations to charities that serve a variety of purposes such as religious activity, helping people in need, health care and medical research, education, arts, environment, and international aid.

Charitable organizations include religious or non-profit organizations that help those in need or that serve and support the public interest. They range in size from national organizations like the United Way and the American Red Cross down to local community organizations. Political contributions are not included.

Donations include money, assets, property or goods, whether made directly to the organization, through payroll deduction, or on the internet.

During 2016, did you (or anyone in your family) donate money, assets, property or goods, with a combined value of more than \$25 to religious or charitable organizations?

2013 Beale-Ross Rural-Urban Continuum Code for 2017 Residence

*This variable is suppressed (filled with zeroes) in the public release file to protect the anonymity of respondents. The data are available in a separate file: FAM19YEAR\_rst where Year is the corresponding Family File year (i.e. FAM1968\_rst contains data for suppressed variables from the 1968 file).*

*These codes are based on matches to the FIPS state and county codes against the 2013 Rural-Urban Continuum Codes published by USDA downloaded from <https://www.ers.usda.gov/data-products/rural-urban-continuum-codes/.aspx>*

*The 2013 Rural-Urban Continuum Codes form a classification scheme that distinguishes metropolitan counties by the population size of their metro area, and nonmetropolitan counties by degree of urbanization and adjacency to a metro area. The official Office of Management and Budget (OMB) metro and nonmetro categories have been subdivided into three metro and six nonmetro categories. Each county in the U.S. is assigned one of the 9 codes. This scheme allows researchers to break county data into finer residential groups, beyond metro and nonmetro, particularly for the analysis of trends in nonmetro areas that are related to population density and metro influence. The Rural-Urban Continuum Codes were originally developed in 1974. They have been updated each decennial since (1983, 1993, 2003, 2013), and slightly revised in 1988. Note that the 2013 Rural-Urban Continuum Codes are not directly comparable with the codes prior to 2000 because of the new methodology used in developing the 2000 metropolitan areas.*

## ER71538 "COMPLETED ED-RP"

NUM(2.0)

Reference Person's Completed Education Level

Values in the range 1-16 represent the actual grade of school completed; e.g., a value of 8 indicates that the Reference Person completed the eighth grade.

Values were computed as follows: If it is not known whether Reference Person attended college (ER70904=8 or 9) or the number of years of college is unknown (ER70907=8 or 9), then the value is 99. Otherwise, if Reference Person attended college (ER70904=1), then the value is 12 plus the number of years of college attended (ER70907). Otherwise, if Reference Person did not attend college, (ER70904=5), the values are as follows:

(a) if Reference Person is a high school graduate (ER70893=1), the value is 12;

(b) if Reference Person received a GED (ER70893=2), the value is the last grade finished (ER70896);

(c) if Reference Person neither graduated from high school nor got a GED (ER70893=3), the value is the last grade finished (ER70901);

(d) if it is not known whether Reference Person graduated from high school, got a GED, or neither (ER70893=8 or 9), then the value is 99.

Education is asked only when the FU acquires a new Reference Person/Spouse/Partner. In cases where the Reference Person has retained the same designation of Reference Person/Spouse/Partner from the previous interview (ER70841=5), this variable has been carried forward from previous years' data. If Reference Person/Spouse/Partner reports updated education and it is higher than previously reported, then this variable is updated. Education was reasked of all Reference Persons in 1985 and 2009 and, as of 2015, all returning Reference Persons/Spouses/Partners are asked for an updated education report every wave. Please refer to variable Year Highest Education was Updated-Reference Person (ER70891) for recency of updated education information.

This variable differs from the individual level variableER34349 in the treatment of Reference Persons who received a GED but did not attend college. The family-level variable value for such Reference Persons is the grade completed; for the individual-level variable, the value is 12.

Year in Which 2017 Reference Person Most Recently Became New Reference Person/Spouse/Partner

*This variable contains the year of data collection in which background information in ER70841-ER70946 was most recently gathered for the 2017 Reference Person. If a Reference Person splits off from the main family, e.g., through divorce, background information is re-asked. Some of this information can change over time; thus, this variable can be used by the analyst to indicate which waves of data might be searched to update the variables concerned. However, in the 1985 and 1997 waves, most background information was re-asked. The 2017 variables that are equivalent to background variables asked of all Reference Persons in 1985 are ER70862-ER70873, ER70880-ER70883, ER70890, ER70893-ER70917, ER70922-ER70939 and ER70941-ER70942; the 2017 variables that are equivalent to background variables asked of all Reference Persons in 1997 are ER70842-ER70848, ER70852-ER70858, ER70882-ER70885, and ER70918. All Immigrant sample Reference Persons were asked this information in 1997 (or 1999, for the Immigrant sample addition). All recontacts were asked for background information in 2017.*

**ER71560      "HOUSEHOLD ID #"**

**NUM(5.0)**

Household ID Number

*This variable was generated to simplify the clustering of multiple panel family units residing in the same households. Its values were assigned simply by selecting a 2017 ID number (ER66002) with the lowest value from among the 2017 ID numbers (ER66002) of those families comprising each such household group.*

*This value was used in these file positions for all of the related households. Thus, if the user sorts the data ordered by this variable, the family units within larger household groups will be adjacent to each other. Family units who did not share their households with any other family unit or shared only with non-panel family units were given their own values for ER66002. The range of values is 1-8738, but the series is not contiguous. See 'Linking Data: Families Sharing Households' in Section I, Part 5, of the guide to the 1993 family data, 93GUIDE.PDF, for a discussion of ways to identify shared households in the early years of the PSID.*

- a) each male Reference Person, unless all of the following were true: he was also Reference Person in 2016, had the same legal Spouse in both waves (ER71542=1 and ER71541=1 and ER66007=0-1), and she was age 45 or older at the time of the 2017 interview.*
- b) each female Reference Person, unless both of the following were true: she was Reference Person, Spouse, or Partner in 2016 and was age 45 or older at the time of the 2017 interview.*
- c) each Spouse or Partner, unless both of the following were true: he/she was Reference Person, Spouse, or Partner in 2016 and was age 45 or older at the time of the 2017 interview.*
- d) all other family unit members, including husbands of Reference Person (ER34303=90) and first-year cohabitators (ER34303=88), who were age 15 through 44 at the time of the 2017 interview.*
- e) all recontact Reference Persons and Spouses/Partners.*

**ER71570      "2017 CORE/IMMIGRANT FAM WEIGHT NUMBER 1"      NUM(7.3)**  
 2017 Core/Immigrant Family Longitudinal Weight

*This weight variable is used for analysis of Core 1968 and 1997/1999 Immigrant families, it excludes the Immigrant families added in 2017.*

*The weight is constructed by summing the individual-level weight values (ER34651) for all persons associated with a given PSID response family in 2017 and calculating the average.*

*Users should note that the new Immigrant 2017 sample (ER66009=4001-4462) has values of zeros for this variable as no historical data is available for these cases and, therefore, they currently should not be included in any longitudinal analysis.*

<u>Count</u>	<u>%</u>	<u>Value/Range</u>	<u>Code</u>	<u>Value/Range</u>	<u>Text</u>
452	4.70	.000			Immigrant 2017 familiy first interviewed in 2017 (ER66009=4001-4462)
