

Global Impact Bonds Database Snapshot September 1, 2023

Since 2014, Brookings has developed and maintained a comprehensive database on the global impact bonds market. The data here represent a snapshot from that database and are updated each month.

As a note, there are a number of projects globally which use the term “impact bond” which don’t meet our definition of an impact bond, which is a series of contractual agreements which ensure:

- Payment for social or environmental outcomes achieved;*
- Up-front repayable finance provided to the service provider by a third party, the repayment of which is (at least partially) conditional on achieving specified outcomes.*

Additionally, the counting of impact bonds may vary depending on the project, leading to some discrepancies in total numbers. Some sources, for example, may count a project that has expanded to multiple municipalities as one impact bond, while in others they may be counted as multiple.

Impact Bonds Contracted Globally

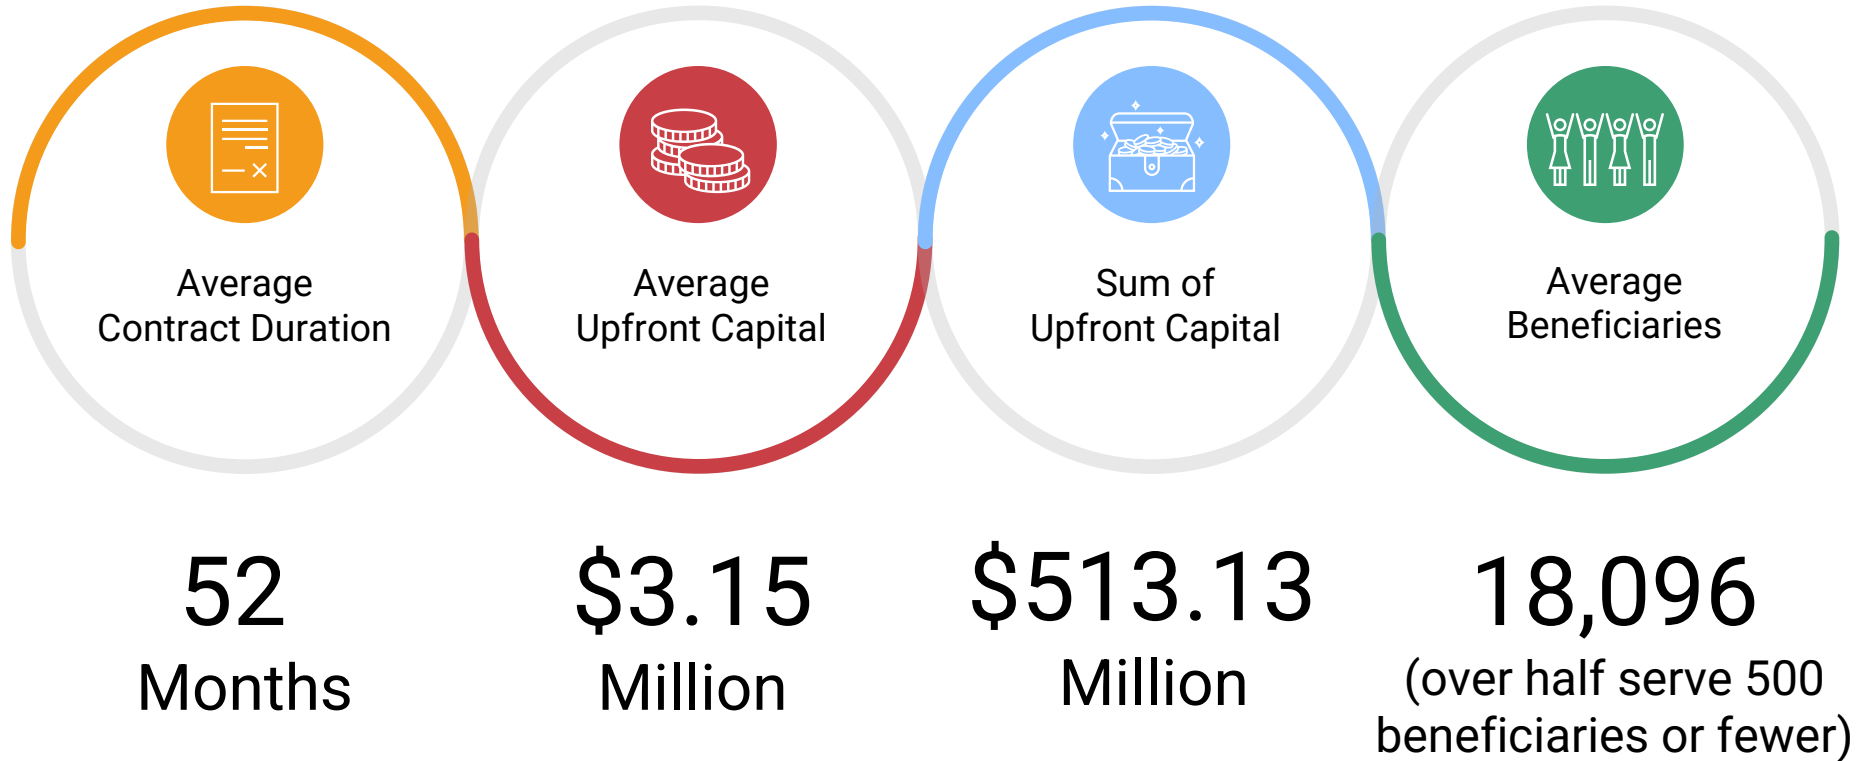

Impact Bonds Contracted by **Sector**

* Social Welfare includes impact bonds addressing homelessness, poverty reduction, and child & family welfare.
